

Jeshua Galao

Websites, Business Systems & Automation

Philippines • jeshuagalao.dev • Jeshua21903@gmail.com • Asia/Singapore timezone

PROFILE

Systems-focused full-stack developer. I build and ship production websites, SaaS, business systems, and APIs, then deploy and keep them running on VPS and Cloudflare. Strong across the JavaScript and TypeScript stack (React, Next.js, Node), with a growing specialization in GoHighLevel and n8n for lead capture, follow-up, and repetitive admin. I move quickly with modern AI coding tools (Cursor, Claude, Codex) while keeping scope honest and delivery grounded.

TECHNICAL SKILLS

Primary stack: JavaScript, TypeScript, React, Next.js, Tailwind CSS, Node.js, Prisma, PostgreSQL, Redis, Zod, Better Auth, Cloudflare, Supabase, GoHighLevel, n8n

Used to ship production websites, SaaS, business systems, APIs, and deployments; specializing in GoHighLevel and n8n.

Working proficiency: C#, Java, PHP, Python, SQL, Discord.js, Docker, VPS deployment, Turborepo, pnpm, shadcn/ui, Radix, Base UI, TanStack Table, React Hook Form, Motion, Inngest, Resend, S3-compatible storage, GitHub Actions, Three.js, React Three Fiber, Firebase, Google APIs, Cloudinary

Developing range: C++, Lua, Rust, Blender, Linux, Ubuntu, SQLite, TimescaleDB, pgvector

Platforms and AI: JSON, AI vectorization, Claude, Codex, GPT

SELECTED WORK

Agency Platform

Confidential client • Full-stack build, ongoing

- Built a custom React Flow canvas editor that uses Mermaid as its import and export interchange, with real-time multiplayer and shareable links.
- Added an outreach tracker to log and manage the prospects the team contacts, plus always-on Discord automation running 24/7 on a VPS.
- Delivered an in-house video hosting system comparable to Wistia; currently implementing AI-assisted interview and resume features.

Independent Developer

Websites, systems & automation • Ongoing

- Build and ship client websites, operational systems, and automation for service businesses.
- Own the full path from discovery to scope to staged build to launch and handoff, with clear outcomes over jargon.
- Deploy and maintain projects on VPS and Cloudflare; integrate calendars, email, and AI assistants where useful.

ROX Coffee + Bar

Client website • Live client work

- Ran proactive outreach with a working demo, then delivered a café site for menu, story, atmosphere, and visit details.
- Opened trust for follow-on loyalty and business-system conversations.

Valley Aroma Coffee & Matcha Brew

Café website + loyalty system • Live client work

- Delivered a deployed café website and digital menu experience for the shop.
- Built a digital stamp-card loyalty program so repeat customers collect stamps and redeem rewards without a paper card.

Work Immersion System

Deployed institutional system • College capstone

- Student monitoring, chat, support tickets, GPS check-ins, and geofenced attendance in one system.
- Deployed on the college server and used in real coordinator and teacher workflows.

KeyStroke

Keystroke overlay (Linux + Windows) • Personal R&D, open source

- Low-latency on-screen keystroke overlay for tutorials and streaming (multi-line layout, modifier combos, MechVibes sound packs, click-through UI). Linux: GNOME Shell extension on Wayland; Windows: native Rust and Win32 port (WH_KEYBOARD_LL), no Electron, with unit-tested cross-platform key logic.

Personal and experimental builds

Portfolio & R&D • Ongoing

- Portfolio at jeshuagalao.dev (Next.js static export plus Cloudflare Worker: booking, lead and audit email, AI chat and TTS); experiments in NFC to CRM flows, Three.js real-time 3D with an AI character, and cross-platform WebSocket multiplayer.

SYSTEMS I COMMONLY SCOPE

Booking and reservations • Inquiry and follow-up • Loyalty and rewards • Online ordering • Queue and walk-ins • Membership and check-in • Quotes and payment tracking • Job and service tracking • Inventory and low-stock alerts • Staff scheduling • Support ticketing • Client portals and dashboards • Discord bots and community automation • Workflow automation (GoHighLevel, n8n) • AI agents and chat assistants

EDUCATION

BSIT, Universal College of Parañaque

- Capstone: Work Immersion System, a deployed operational system for student immersion monitoring.
